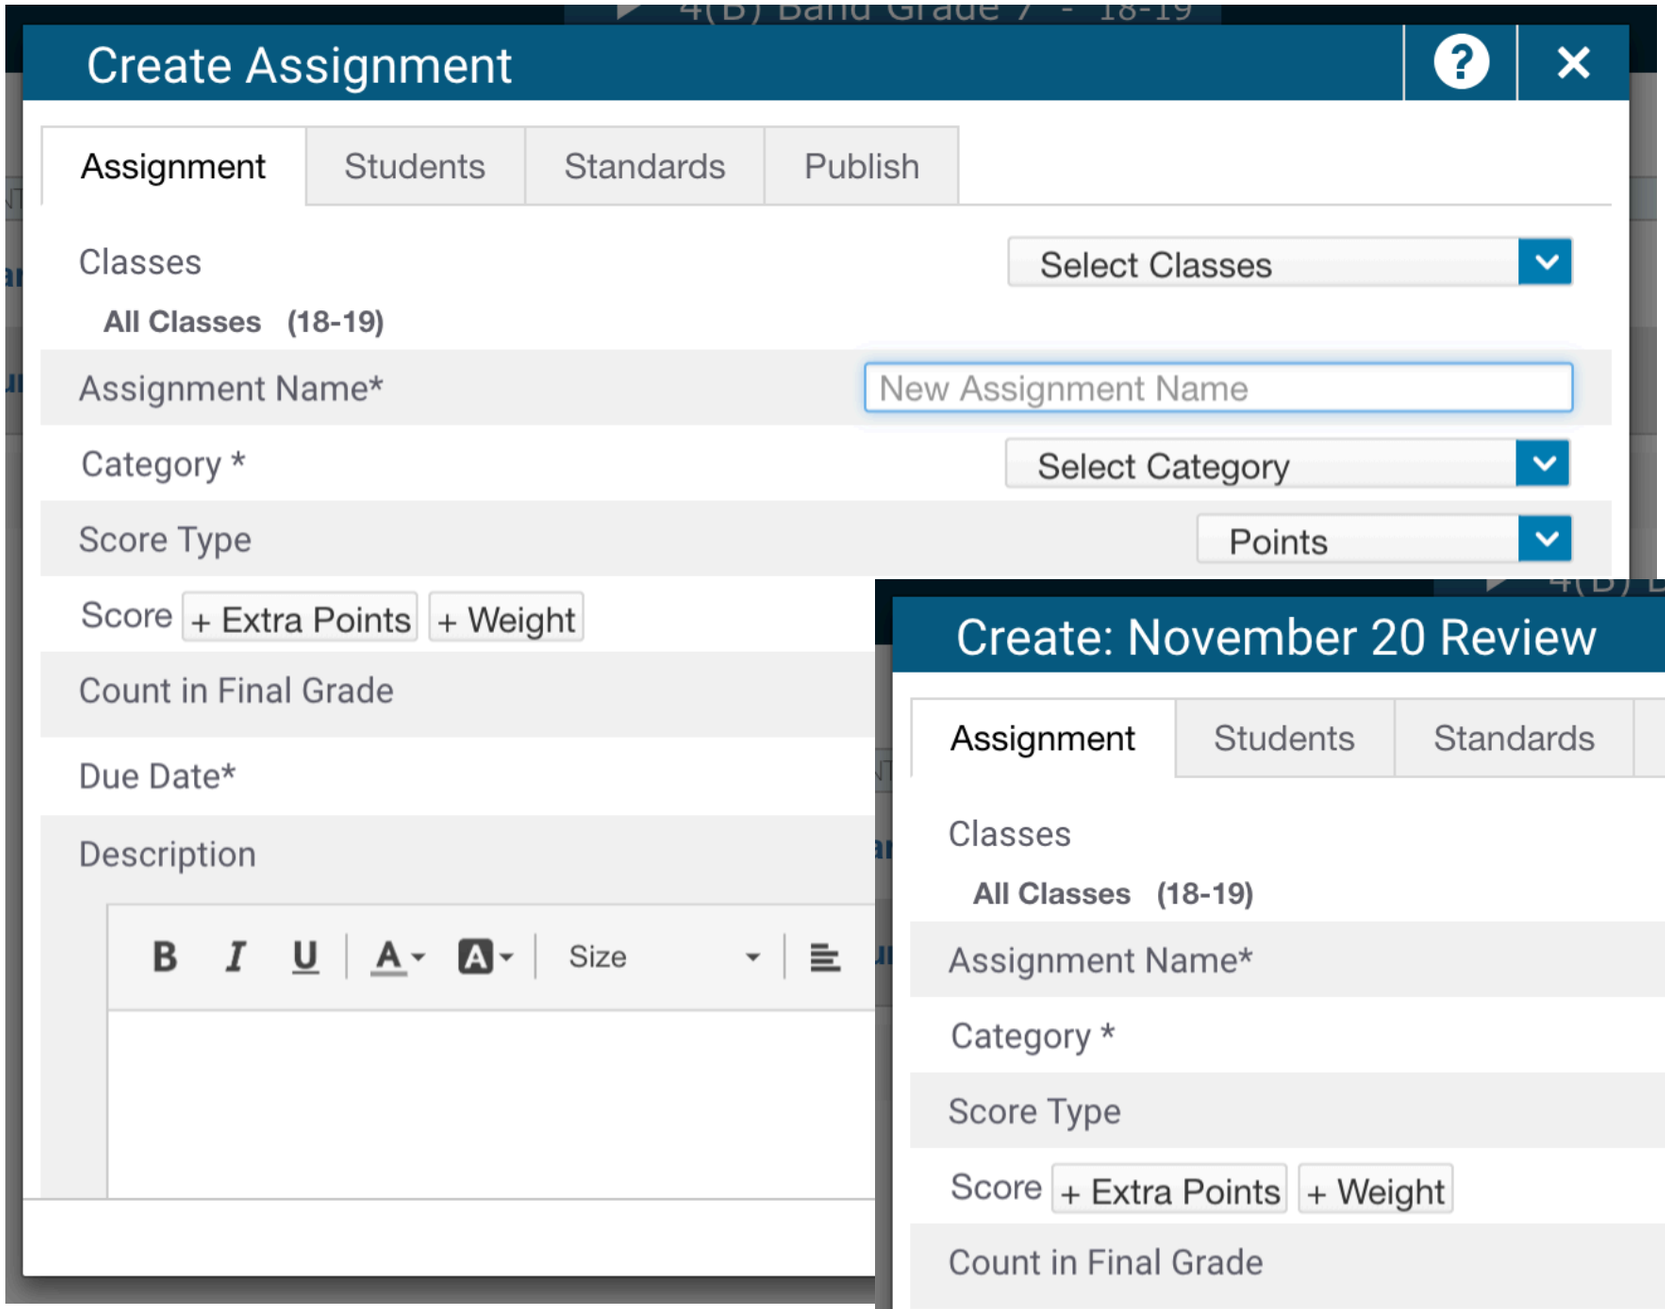
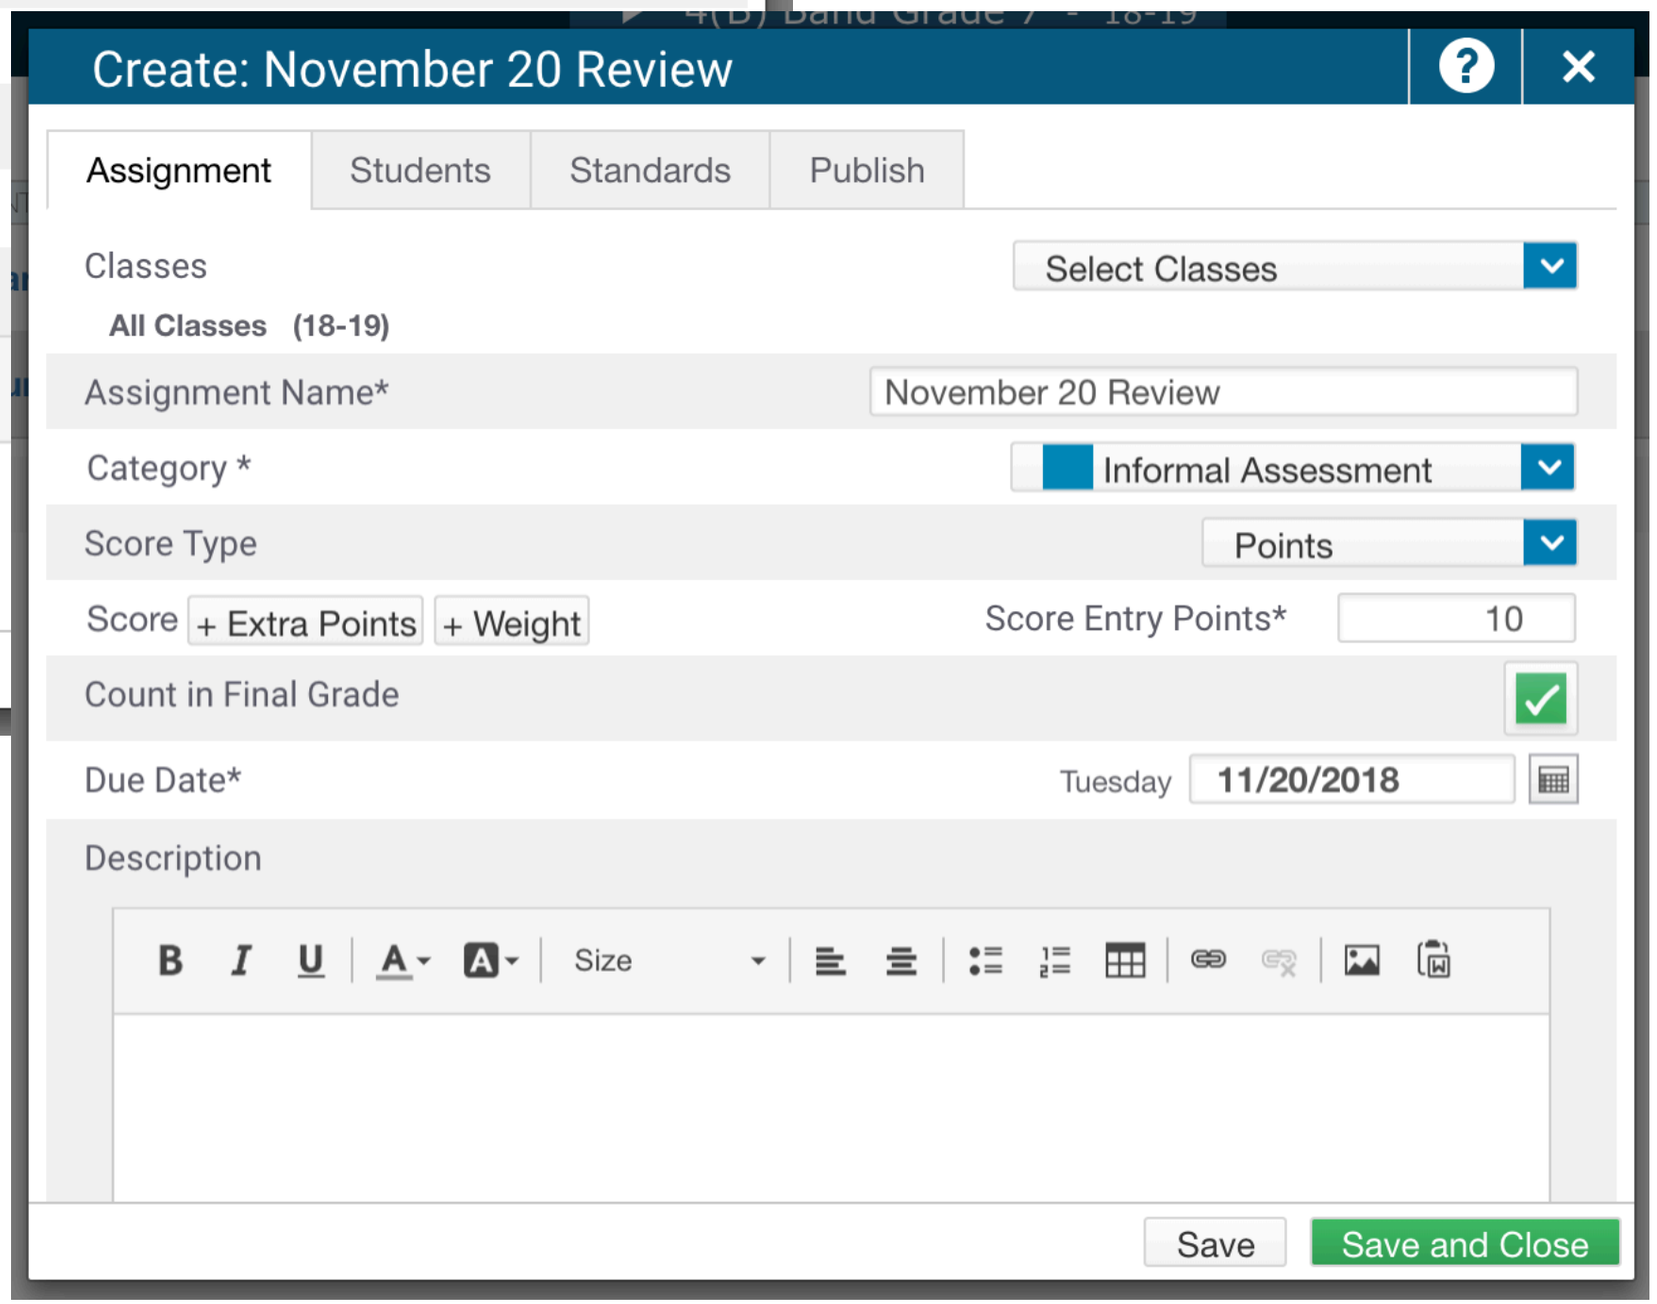
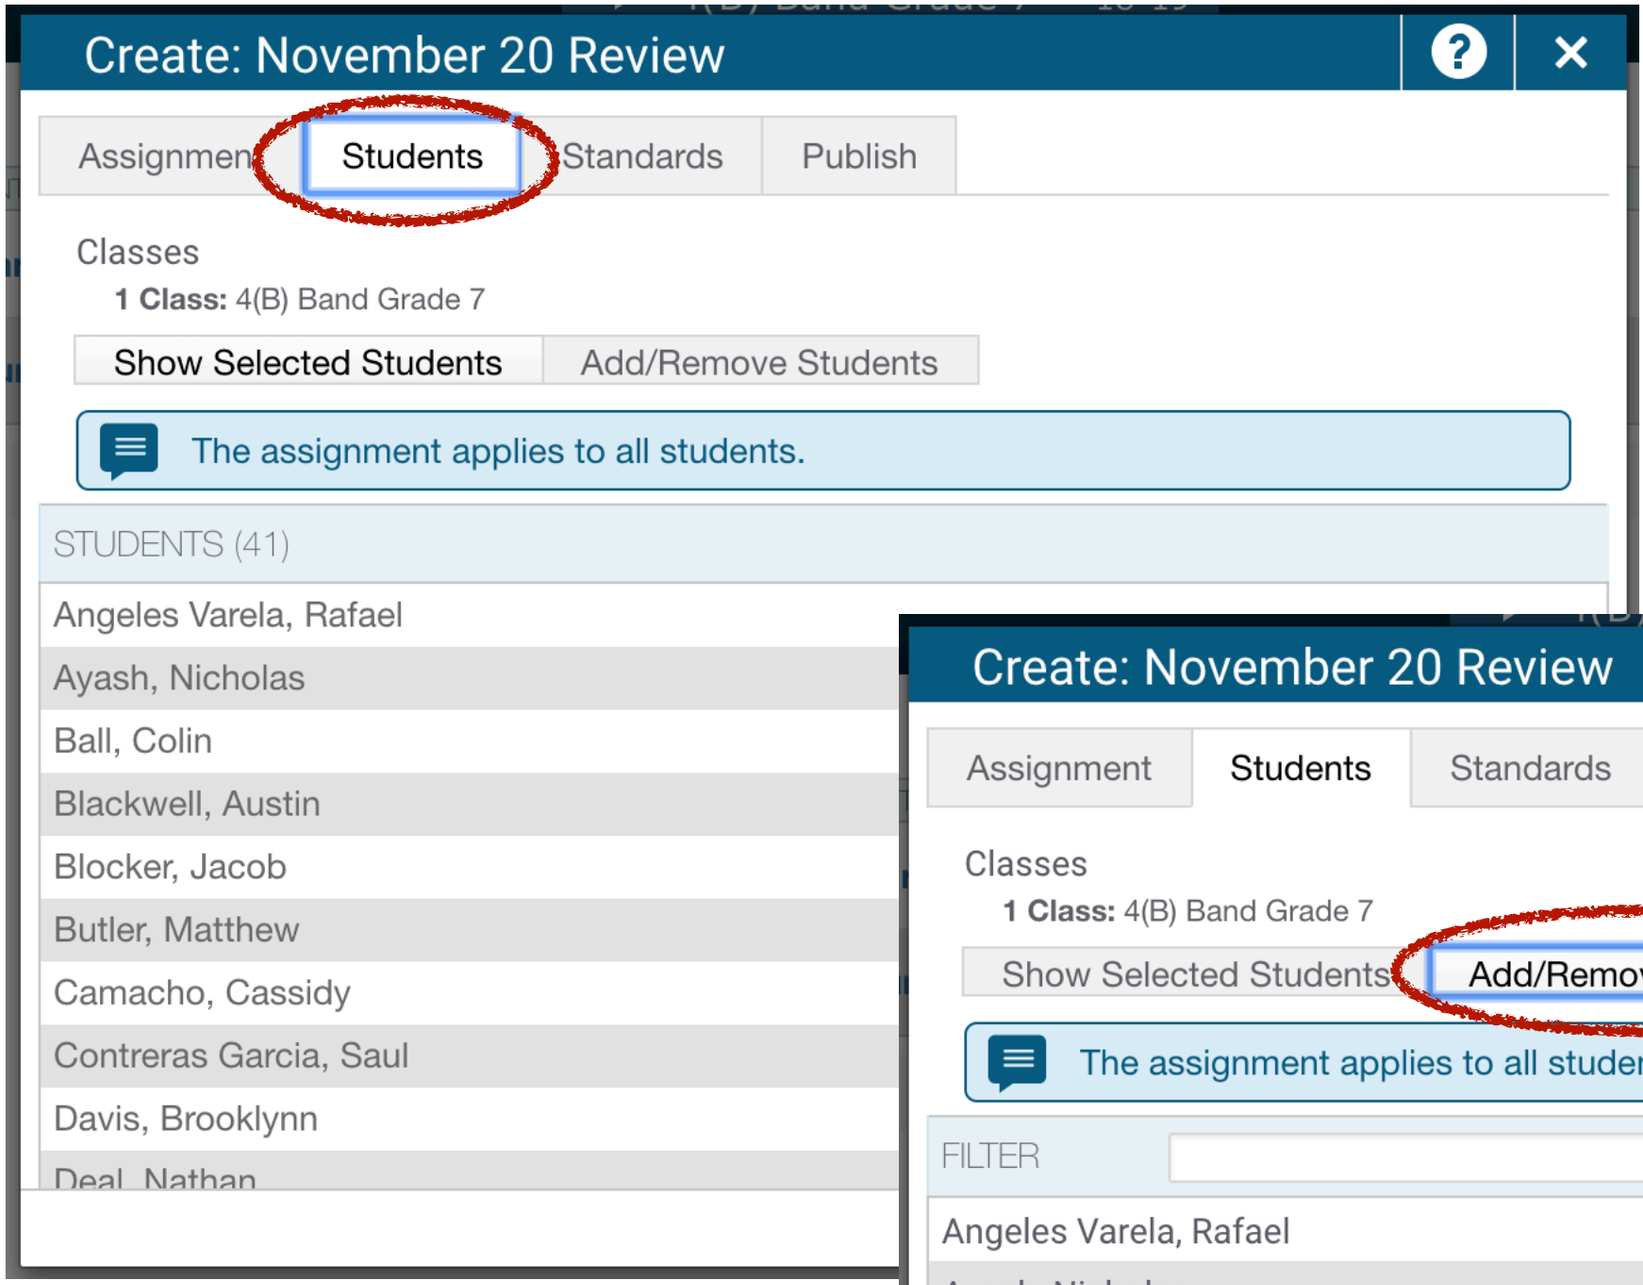
Creating Assignments for Certain Students in PowerTeacher Pro



Click the “Create” button and choose “Assignment” as usual.

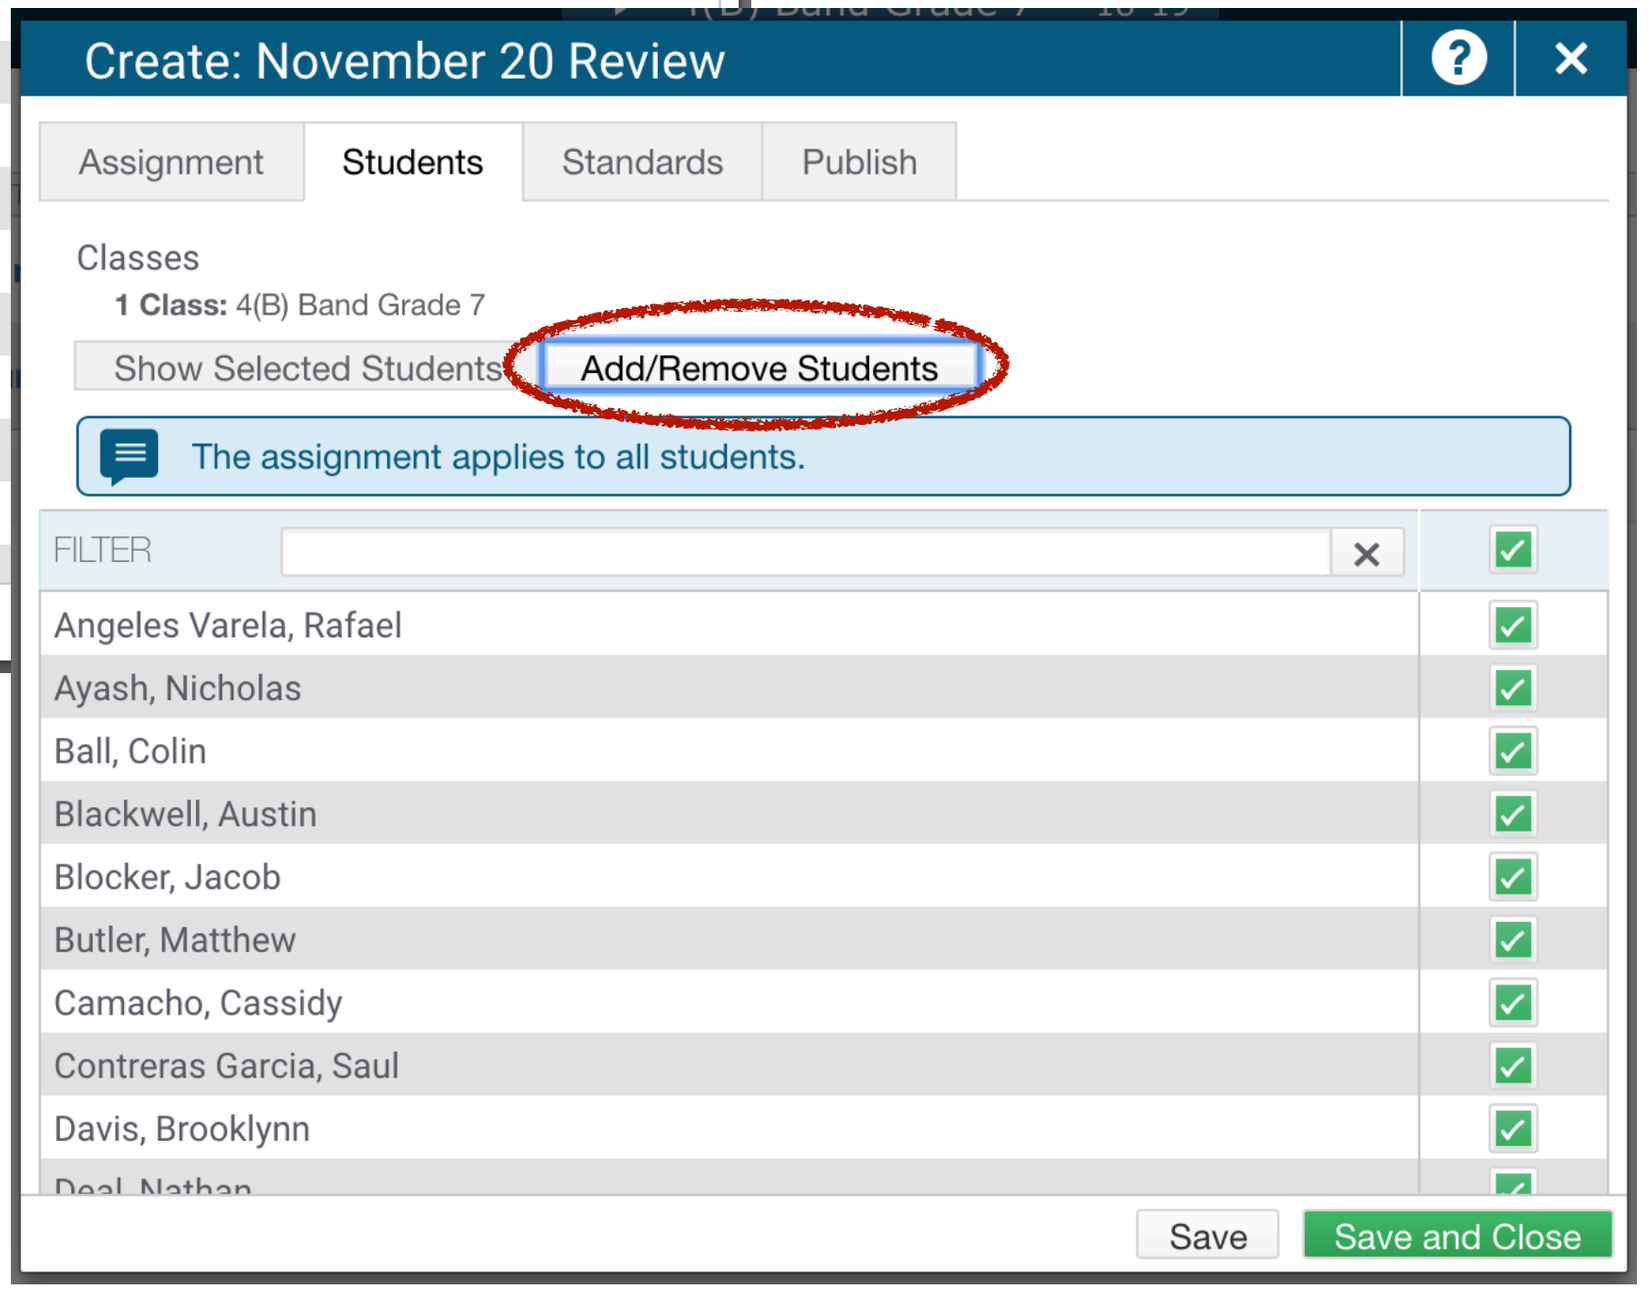


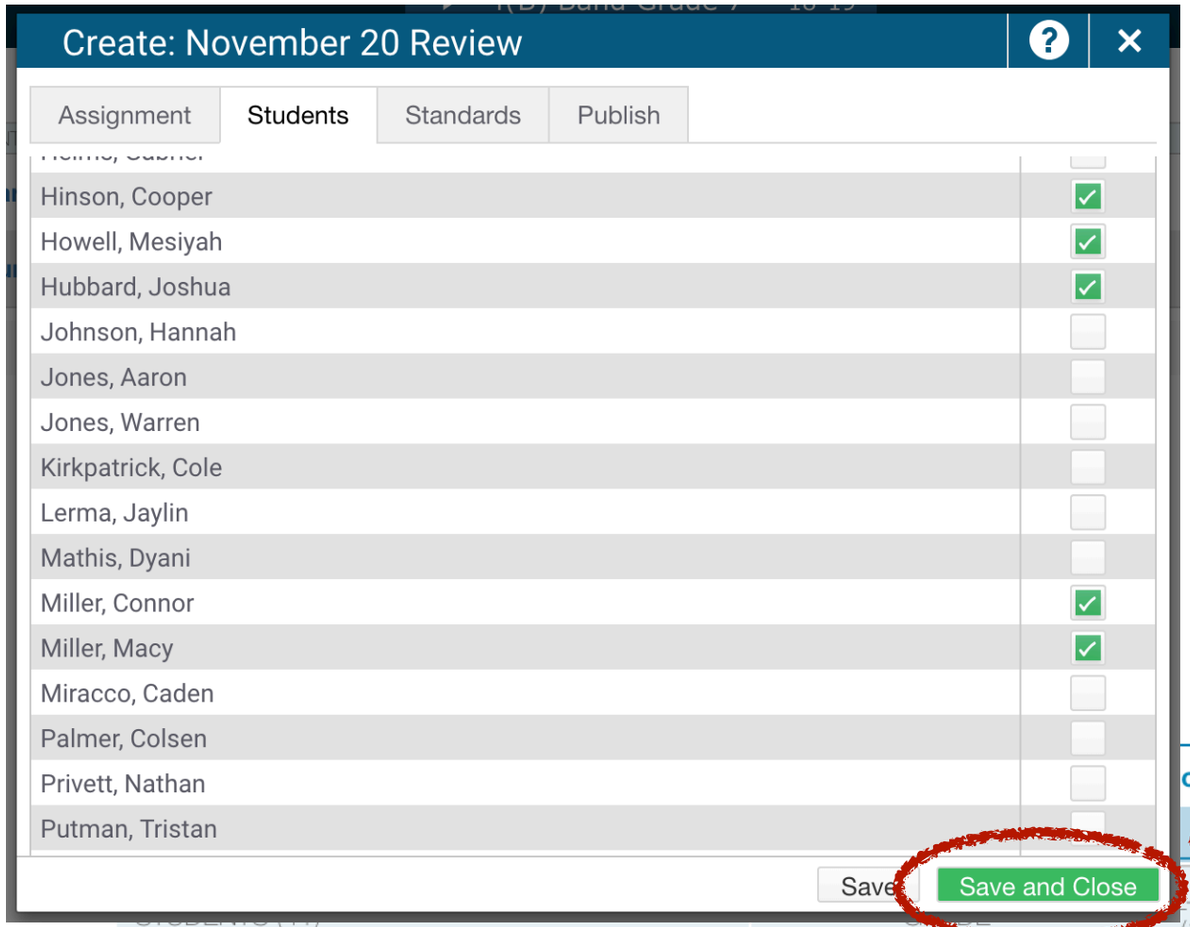
Choose the classes to which this assignment will apply and fill out other categories as needed.
Do not click “Save and Close” yet.



Click the "Students" tab to see the list of students to which the assignment will be assigned.

Click the "Add/Remove Students" tab and check only the students to which you want to give the assignment.





Click “Save and Close”

In your grade spreadsheet view:

Notice the students who are not given the assignment will have diagonal lines through the box under that assignment.

The students who should complete the assignment will not have the diagonal lines through the box.
