

Set up email in the Outlook for Android app

If you're having trouble using the Outlook for Android mobile app, [Open an in-app Outlook support ticket](#).

If you have a work or school account that uses Office 365 for business or Exchange-based accounts, there may be additional requirements set by your IT admin. For example, if you have a company-managed device, an on-premises Exchange server configured for basic authentication, or your company requires mobile app management for app protection. See the section Set up Outlook for Android with additional requirements below for specific instructions.

Set up Outlook for Android for the first time

1

Set up another email account

Note: If you have a work account that requires the **Intune Company Portal** app, install it from the Google Play Store before setting up Outlook for Android. Your IT admin may or may not also require you to [Enroll your Android device in Intune](#).

Install the **Outlook for Android** app from the

Set up work/school accounts that have additional requirements

Some work and school accounts have additional security requirements before you can use Outlook for Android. If you're not sure which of these situations applies

[Google Play Store](#) and then open it.

Tap **Get Started** if this is your first time.

Otherwise, to add another email account, open the

Menu

Settings

Add Account

> **Add Email Account.**

Then skip to step 4 under Set up another email account below.

3

Select the accounts you'd like to add and tap **Add Account**. You may be asked to sign in.

Tap **Allow** to confirm offline access and any other prompts.

to your work or school account, talk to your Office 365 admin.

Click on an expander to open it:
